# ELKAY®

Model **number matrix**

TABLE OF CONTENTS

BASIC RULES

- **Filtered water coolers** & bottle fillers begin with an "L".

- **Models ending in "K"** indicate a kit or (PTO pick-to-order item) which ships in multiple cartons. Exception is the EZWSRK and LZWSRK models.

- **Standard "TL" two-level design** is Left-High/Right-Low. "TLR" designs are a reverse configuration with Left-Low/Right-High. EZS & LZS style units have versatile design which allows either installation style.

- **"G" or "GRN" indicates a Green** (high-efficiency) refrigeration system.

- **Units with "F" indicating Glass Filler Prepped** require the glass filler accessory to be purchased separately and field installed. Choices are LK1110 or LK1114. Units with a back or recessed design, such as EHFSA and EFRC, use the LK109A glass filler which is factory installed.

- **BL** means Blank.

EZH2O® BOTTLE FILLER MODELS

ENHANCED EZH2O® BOTTLE FILLER - WATER COOLER COMBO MODELS

LZS TL 8 WS L P
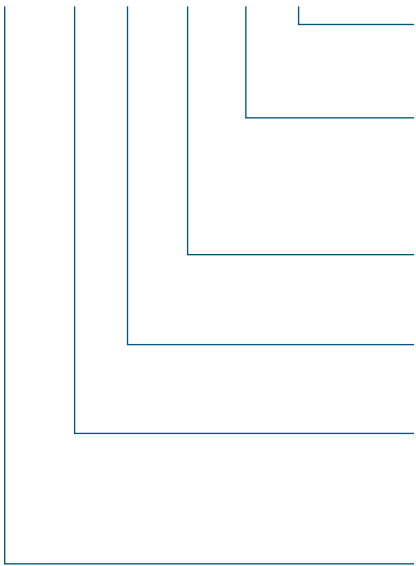

PACKAGING		
P	**=**	One Box Packaging

COOLER PANEL FINISH
