

ELKAY®

Drinking Water and Its Impact on Education

A fundamental factor for the development of students.

Did you know that ...

Providing water to children in schools **greatly benefits their health and learning**

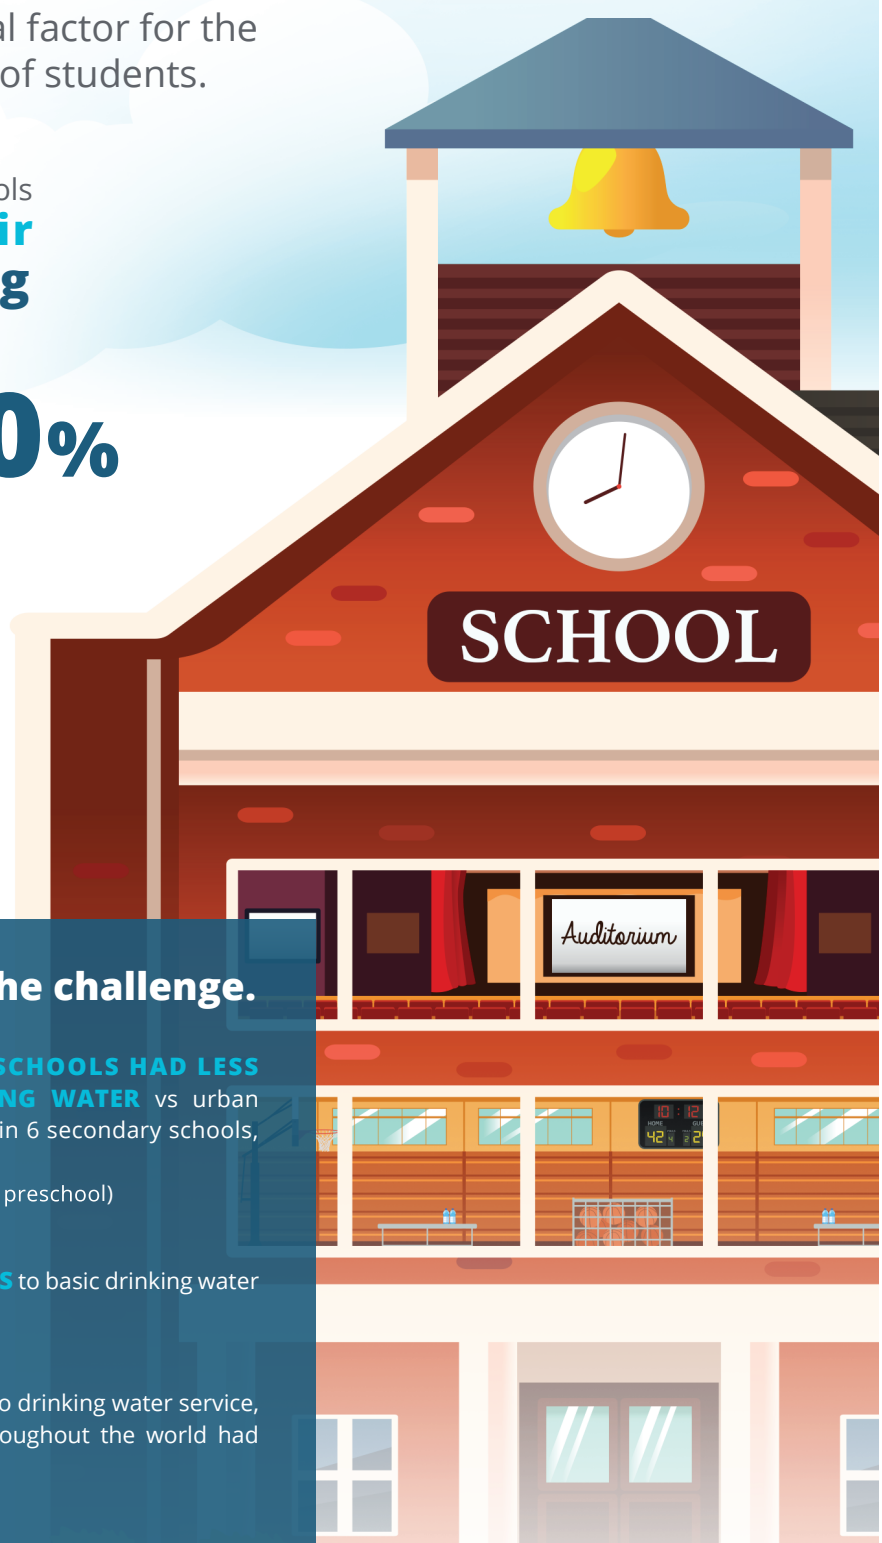

When children are thirsty **their concentration is reduced by 10%**

During 2018, **320,000 reusable bottles** were donated to schools in the city of Manhattan

By 2020, it will result in **100 million** less plastic bottles

Availability of Drinking water is the challenge.

IN ALMOST ALL OF THE WORLD, RURAL SCHOOLS HAD LESS COVERAGE OF BASIC SERVICES OF DRINKING WATER vs urban schools. In 2016, 1 in 4 elementary schools and 1 in 6 secondary schools, do NOT have them. (Insufficient data to calculate the global estimates for preschool)

34 OUT OF 92 COUNTRIES DO NOT HAVE ACCESS to basic drinking water service in their schools.

IN 2016, 19% OF THE WORLD'S SCHOOLS had no drinking water service, which means that almost 570 million children throughout the world had limited or no drinking water service in their schools.

Did you know that ... **Elkay has products that meet the standards to provide drinking water in schools, from the classroom to the cafeteria.**
